

Support Services - BEMS Solutions

CSL work direct with building owners and building service maintenance companies alike, and boast a range of service offerings, from break downs to full time onsite engineers and everything in between. Please give us a call to discuss to the best services available for your individual requirements.

Some of the services we provide include:

Planned preventative maintenance (PPM)

Including pre seasonal visits to ensure your system is ready for the change in weather conditions.

CSL can also recommend and undertake system enhancements to get the best out of your BEMS system, whether it's improvements in the environmental conditions or a reduction in energy usage.

continued...

"Combined Services remains our preferred choice of service partner not just for their high levels of professionalism and technical expertise, but also because of the unique way that at every level they engage with our team building up an excellent cross party rapport that ensures our customers needs are always exceeded. Combined Services strive to go the extra mile in order to support our projects and are always on hand to provide out of scope ad-hoc support"

Support Services

Breakdown call-outs.

We provide breakdown assistance for when the unexpected or inevitable happens.

Service contacts.

From labour only to fully maintained to permanent on site engineers.

Bureau services

We offer a range of Bureau Services from remote monitoring to remote maintenance, support, testing and system enhancements. Our internal IT expertise and remote connectivity solutions enable us to select the most suitable method to connect to your existing networks.

Energy audits

Our Energy audits involve a detailed assessment of the building, associated BEMS and plant. Our audit will be used to produce a list of energy saving initiatives (including quick wins), which will be passed to the client to make informed decisions and ROI (return on investment) calculations.

System upgrades

Dilapidated BEMS systems can lead to energy wastage and substantial business disruptions due to failure of obsolete equipment. Please call us to discuss how we can upgrade your out dated control system to a CSL BEMS. ◆
